Submit

Form validation:

1. Username, password fields, email and Terms & Conditions checkbox are mandatory
2. Email should be validated
3. Username should be min 6 chars and max 50 chars
4. Password should be at least 8 chars, should contain at least one upper letter, one lower letter and a "special" char (! @ # \$ % ^ & \* ( ) - =)

Consideration:

1. Username and Email should be unique in database
2. Categories and hobbies can grow in time up to 500
3. If a validation fails, an error should be displayed on the form and all data entered before submitting the form should be visible on form

What should be taken care of:

1. Code clarity and code styling
2. Database structure
3. Reading/Writing/Handling data between HTML form, PHP and database
4. An OOP implementation is expected
5. Please provide the solution using PHP vanilla (without using any framework)
6. Form design is not important
